## **Servue expands its services with product delivery to three new Head Start Agencies**

**Los Angeles, CA- April, 1, 2006**— Servue, the premier one stop web application provider, announced today it has completed initial delivery of their web application solution DATA MANAGER to three Head Start Agencies, including Rutland County Head Start, Alamosa Head Start, and Fresno Migrant Head Start.

Servue will enable these agencies to use their online Child Data Manager solution and automated processes to meet all agency requirements for child data management and reporting, including IPR requirements. Servue solution helps to increase process efficiency, increase productivity and provides real time reporting and status information to associated managers

These agencies business is quickly expanding, both in the number of employees and infrastructure. Managing this growth requires a detailed analysis of systems and procedures. Servue's on-the-fly reporting tools help them manage growth and reduce the need for additional analysts and programmers."

Hamid Kohan, President of Servue stated, "We bring to the table technologies that are out of the financial reach of most Head Start Programs. Plus, as our tools are web based, there are no infrastructure costs that are normally associated with this type of application." Kohan also emphasized that the web-based nature of the products make them ideal for remote access. "This new technology enables us to provide immediate customization of forms, application and reports with any additional programming".
